COLOR AND PATTERN 1

COAT (40)

Texture and Length	20
Curl or Waviness	20

GENERAL: the LaPerm is a naturally occurring mutation producing both long and shorthaired cats. It is medium sized, curly coated with moderate type. All coat colors and eye colors are acceptable. All parts of the body are in harmony with the size of the cat. There is evidence of surprising weight for size. The cat is alert and seems to be walking tall on his feet. Females are generally smaller than males. This breed matures in 2-3 years, with the females maturing sooner than the males. Allowances are to be made for age and sex.

HEAD: the skull is a modified wedge, slightly rounded with gentle contours. Whisker pads should appear full and rounded, with long, flexible whiskers.

MUZZLE: broad with rounded contours and moderate to strong whisker pinch. Chin strong and firm presenting a perpendicular line down from the tip of the nose. Allowances should be made for jowls on mature males.

PROFILE: slight dip to nose just below bottom of eye, then continuing straight to tip of nose. Dip must be felt for, as it can appear straight. Forehead should be a flat plane to the top of the head, then smooth gentle curve back over top of head flowing into neck.

EARS: placed to continue the modified wedge of the head, slightly flared and cupped, medium to large. Full furnishings and earmuffs with lynx tipping is preferred on longhair variety but not required on the shorthair variety.

EYES: medium large and expressive, almond in shape at rest and rounder when alert. Set moderately far apart and slightly slanted toward base of ear. Eye color has no relation to coat color.

BODY: moderate in size with medium fine to medium boning. Hips are slightly higher than shoulders. Allowances are made for larger sizes in males, as long as they remain balanced and in proportion.

NECK: carried erect, medium long in length in proportion to body

LEGS AND FEET: medium long to match body length. Forelegs may be slightly shorter than hind legs. As with body, medium fine boning with rounded feet.

TAIL: in proportion to body, tapering from base to tip.

COAT—LONGHAIR: Texture and length: semi-longhair, both males and females may have ruff on neck at maturity. The coat should be free of matting, so it should not be too thick and heavy. The tail is plumed with some curling. The coat is springy, light and airy. The feel may vary among individual cats and/or color. **Curl or waviness:** curly or wavy, curl is preferred. The coat should be loose and bouncy and should stand away from the body, a coat you can run your fingers through to the skin. The coat is light and airy enough to part with a breath. The coat will have an almost unkempt

appearance (the “Gypsy Shag” look). Tightest curls are in the ruff and the base of the ears; longest curls are in the ruff, base of the ears, and at the base of the tail. The coat may vary in length and fullness according to the season and maturity of the cat. At times this coat will part naturally down the middle of the back.

COAT—SHORTHAIR: Texture and length: short to approximately medium-long. The tail is not plumed but hair may be wavy. The coat is springy, light and airy. The texture may be harder than longhair and will vary among individual cats and/or colors. The coat will stand away from the body with waves over most of the cat. **Curl or waviness:** curly or wavy. Is not required to have a ruff, ringlets or earmuffs. The tail will be like a bottlebrush. At times this coat will part naturally down the middle of the back.

PENALIZE: bare patches, sparse coat in mature specimens.

DISQUALIFY: cobby body, short legs, crossed eyes, incorrect number of toes, visible and non-visible tail faults, straight hair.

COLORS

COAT COLOR: any genetically possible color or combination of colors is allowed. **EYE COLOR:** eye color can be copper, gold, yellow, green, blue, aqua (in specimens with mink color), or odd. There is no correlation required between coat color and eye color.

WHITE: pure glistening white. **Nose leather and paw pads:** pink.

BLACK: dense coal black from roots to tip of fur. **Nose leather and paw pads:** black.

BLUE: one level tone most important, light shade preferred. **Nose leather and paw pads:** blue.

RED: deep, clear, without markings or ticking. **Nose leather and paw pads:** pink.

CREAM: one level shade of buff cream without markings. **Nose leather and paw pads:** pink.

CHOCOLATE: rich, warm chocolate-brown, one level tone. **Nose leather and paw pads:** pink.

FAWN-CREAM SMOKE: Nose leather and paw pads: lavender pink, may be mottled with pink.

CLASSIC TABBY PATTERN: markings dense, clearly defined and broad. Legs evenly barred with bracelets coming up to meet the body markings. Tail evenly ringed. Several unbroken necklaces on neck and upper chest, the more the better. Frown marks on the forehead form intricate letter "M". Unbroken line runs back from outer corner of eye. Swirls on cheeks. Vertical lines over back of head extend to shoulder markings which are in the shape of a butterfly with both upper and lower wings distinctly outlined and marked with dots inside outline. Back markings consist of a vertical line down the spine from butterfly to tail with a vertical stripe paralleling it on each side, the three stripes well separated by stripes of ground color. Large solid blotch on each side to be encircled by one or more unbroken rings. Side markings should be the same on both sides. Double vertical row of buttons on chest and stomach.

MACKEREL TABBY PATTERN: markings dense, clearly defined and all narrow pencillings. Legs evenly barred with narrow bracelets coming up to meet the body markings. Tail barred. Necklaces on neck and chest distinct; like so many chains. Head barred with an "M" on the forehead. Unbroken lines running back from the eyes. Lines running down the head to meet the shoulders. Spine lines run together to form a narrow saddle. Narrow pencillings run around body.

SPOTTED TABBY PATTERN: markings on the body to be spotted. Spots can be round, oblong or rosette-shaped. Any of these are of equal merit but the spots, however shaped or placed, should be distinct. Spots should not run together in a broken mackerel pattern. A dorsal stripe runs the length of the body to the tip of the tail. The stripe is ideally composed of spots. The markings of the face and forehead shall be typically tabby markings. Underside of the body to have "vest buttons". Legs and tail are barred.

TICKED TABBY PATTERN: body hairs to be ticked with various shades of marking color and ground color. Body when viewed from top to be free from noticeable spots, stripes, or blotches, except for darker dorsal shading. Lighter underside may show tabby markings. Face, neck, legs, and tail may show tabby striping.

PATCHED TABBY PATTERN: a patched tabby (torbie) is an established Classic, Mackerel, Spotted or Ticked Tabby in silver, brown, blue, chocolate, lavender, cinnamon, or fawn with patches of red and/or cream clearly defined on both the body and extremities; a blaze on the face is desirable. Nose leather and paw pads: same as non-patched tabbies, may be mottled with pink.
